

The Future of Foodservice

At **Automated Restaurant Solutions (ARS)**, we're reshaping how and where people experience great food. By pairing beloved national brands with cutting-edge robotic technology from **LBX Food Robotics**, we've created a freestanding, fully-autonomous dining experience that brings restaurant-quality meals to places traditional food service can't reach.

We bring trusted brands, premium food, and intelligent automation into one scalable platform — delivering fresh, hot, high-quality meals in minutes, 24/7, with no kitchen, staff, or steep overhead required.

Why it matters

Today's guests want more than convenience — they want real meals they know and love, available on demand. Operators, meanwhile, need solutions that are cost-effective, labor-light, and easy to scale. Automated Restaurant Solutions delivers both:

- Nationally Recognized Brands – Give guests trusted, crave-worthy meals from household restaurant names
- Turnkey & Scalable – Install anywhere with minimal buildout and no kitchen infrastructure
- Always On – Serve high-quality meals 24/7 without staff or prep
- Low Overhead – Minimal labor, consistent performance, and predictable returns

**AUTOMATED
RESTAURANT
SOLUTIONS**

High-quality, convenient, restaurant-branded solutions for any environment

ARS thrives in spaces where food service struggles to operate, or simply doesn't exist!

Hotels & Lodging

Enhance guest satisfaction and revenue without a full-service kitchen.

Universities & Corporate Dining

Feed students and employees on demand – no cafeteria needed.

Hospitals & Healthcare Facilities

Offer staff, patients, and visitors reliable, hot meals 24/7.

EV Charging Stations

Transform waiting time into mealtime – pair dining with charging.

Airports & Transportation Hubs

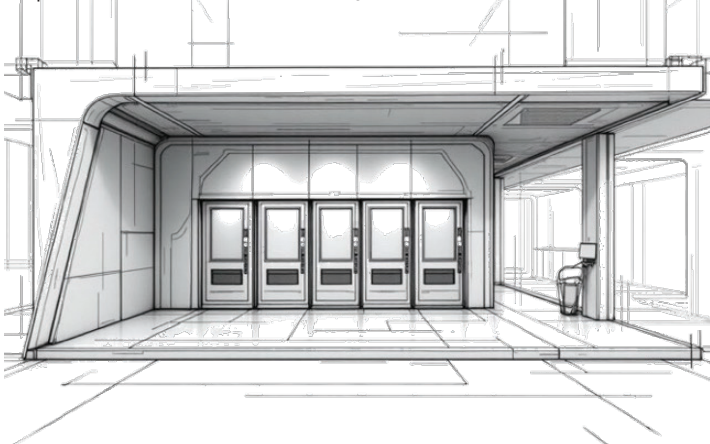

Serve travelers around the clock when traditional concessions are closed or inconvenient.

Turnkey installation & simple operation

Choose from a single branded kiosk or deploy a fleet of units to offer multiple cuisines and beverage options.

Each kiosk is preloaded with proven menus, sourced through national distributors, and backed by LBX Food Robotics' reliable technology.

Operation is seamless – easily load and service, and monitor and manage remotely. No chef. No staff. No complexity.

- Generate new revenue streams from unused space
- Enhance guest experience with recognizable brands
- Deliver fresh meals in minutes, anytime, anywhere
- Operate efficiently with no kitchen, no overhead, no downtime
