California Pizza Kitchen Kiosk FAQs

Are these the same CPK pizzas served in restaurants?

Yes! The pizzas available for the CPK kiosk use the same ingredients, patented recipes, and kitchens. CPK kiosk pizzas are crafted specifically by the CPK culinary team for the LBX Food Robotics smart oven, which combines heating technologies to ensure high-quality results. With perfectly portioned ingredients and packaging designed to crisp and brown just right, the pizzas come out with bubbly cheese, crispy crusts, and bold, signature flavors, all in under three minutes. You get the same CPK quality you love, available anytime.

Where do the pizzas come from?

CPK pizzas are created by CPK and distributed through Sysco.

Can I serve CPK's pizzas in my existing Bake Xpress?

CPK pizzas may only be offered in a CPK-branded kiosk for optimal customer experience.

Where can I put my CPK kiosk?

Anywhere with a power outlet and hungry customers!

Popular locations include:

- Airports & transportation hubs
- Hospitals & medical centers
- Universities & schools
- Office buildings & retail centers
- Casinos & hotels

What kind of support is available?

Automated Restaurant Solutions provides full onboarding, menu setup, marketing support, and ongoing technical assistance. We'll guide you through everything from machine installation to inventory management. In some locations, we can offer operational support as well.

Ready to get started?

We are looking forward to baking with you!
